Viper-X Interior Non-Structural Studs and Track by CEMCO

Health Product Declaration v2.2

created via: HPDC Online Builder

HPD UNIQUE IDENTIFIER: 26596
CLASSIFICATION: 09 22 16 Non-Structural Metal Framing
PRODUCT DESCRIPTION: The Viper-X® Drywall Framing System offers all the benefits of conventional flat steel studs with a design that performs even better. Viper-X Interior Non-Structural Studs and Track consist of 100% hot-dip galvanized steel, and are used for framing of interior nonload-bearing composite and non-composite walls. Viper-X Tracks® are fabricated in 1-5/8", 2-1/2", 3-1/2", 3-5/8", 4", and 6" widths with 1-1/4", 1-1/2", and 2" legs from standard G40 hot-dipped galvanized steel. Viper-X Studs® are fabricated in 1-5/8", 2-1/2", 3-1/2", 3-5/8", 4", and 6" widths from standard G40 hot-dipped galvanized steel; G60 and G90 coatings are available upon request. Viper-X 18 (0.0179 min) and Viper-X 22 (0.0223 min) Studs and Tracks manufactured by CEMCO have received an Evaluation Report (UER 0524) from IAPMO Uniform Evaluation Service, providing evidence that the Viper-X Drywall Framing System meets code requirements. Viper-X Drywall Nonstructural Framing Members and Accessories Material Specification (ASTM) A1003/A653/A924; Product Specification (ASTM) C645; Coating Specification (ASTM) A1003/A653/A924; Installation (ASTM) C754. All CEMCO products are manufactured in the USA at one of our four state-of-the-art production facilities strategically located in four major metropolitan markets to ensure that service and quality requirements are met. May also include the following CSI MasterFormats: 09 21 16 Gypsum Board Assemblies; 09 22 00 Supports for Plaster and Gypsum Board.

Section 2: Content in Descending Order of Quantity

This section lists contents in a product based on specific threshold(s) and reports detailed health information including hazards. This HPD uses the inventory method indicated above, which is one of three possible methods:

- *Basic Inventory method with Product-level threshold.*
- *Nested Material Inventory method with Product-level threshold*
- *Nested Material Inventory method with individual Material-level thresholds*

Definitions and requirements for the three inventory methods and requirements for each data field can be found in the HPD Open Standard version 2.2, available on the HPDC website at: www.hpd-collaborative.org/hpd-2-2-standard

VIPER-X INTERIOR NON-STRUCTURAL STUDS AND TRACK

PRODUCT THRESHOLD: 1000 ppm

RESIDUALS AND IMPURITIES CONSIDERED: Yes

RESIDUALS AND IMPURITIES NOTES: Residuals and Impurities were “Considered”, as outlined in Emerging Best Practices. No residuals or impurities are known or expected to be present at or above the Content Inventory Threshold indicated that have a GS score of BM-1, LT-1, LT-P1 or NoGS based on information provided in supplier SDS and as predicted by process chemistry (Pharos CML). However, supplier SDS states the following: "All commercial steel products may contain small amounts of various elements in addition to those specified. These small quantities (less than 0.1%) may exist as intentional additions, or as “trace” or “residual” elements that generally originate in the raw materials used. These elements may include: aluminum, antimony, arsenic, boron, cadmium, calcium, chromium, cobalt, columbium, copper, lead, molybdenum, nickel, silicon, tin, titanium, vanadium, and zirconium."

OTHER PRODUCT NOTES: Standard G40 hot-dipped galvanized steel. Passivation coatings for corrosion resistance are an industry standard for this type of material; however, the substances used for such coatings fall below the inventory threshold (0.1% or 1000 ppm) of the material, and are therefore not reported here.

SUBSTANCE NOTES: CEMCO cold-formed steel framing products contain 30% to 37% pre- and post-consumer recycled steel sourced from several domestic (USA) suppliers. Specific guidelines are being created to address known issues related to transparency and disclosure for several materials (“Special Conditions”), including Metal Alloys such as Steel. This HPD will be updated as appropriate when these guidelines become available. Supplier reports the following composition of alloying elements: max 0.9% Manganese (7439-96-5; LT-P1); max 0.6% Carbon (7440-44-0; LT-UNK); max 0.6% Silicon (7440-21-3; LT-UNK); max 0.5% Copper (7440-50-8; LT-UNK); max 0.15% Phosphorus (8049-19-2; NoGS); max 0.1% Calcium (7440-70-2; LT-P1).

SUBSTANCE NOTES: Form-specific hazards not expected to apply to the finished and installed product; however, further processing (e.g. welding, sawing, etc) during installation may release fumes or other respirable particles. The Safety Data Sheet (SDS) for Galvanized Sheet Steel can be found at http://cemcosteel.com/cemco-submittal-creator.

Section 3: Certifications and Compliance

This section lists applicable certification and standards compliance information for VOC emissions and VOC content. Other types of health or environmental performance testing or certifications completed for the product may be provided.

VOC EMISSIONS — **Inherently non-emitting source per LEED®**

Section 4: Accessories

This section lists related products or materials that the manufacturer requires or recommends for installation (such as adhesives or fasteners), maintenance, cleaning, or operations. For information relating to the contents of these related products, refer to their applicable Health Product Declarations, if available.

No accessories are required for this product.

GYPSUM WALLBOARD — HPD URL: **https://www.hpd-collaborative.org/hpd-public-repository/**

CONDITION WHEN RECOMMENDED OR REQUIRED AND/OR OTHER NOTES:
For installation of drywall framing system. Several domestic (USA) gypsum wallboard suppliers have published HPDs available for their products; see HPD Public Repository for more information and to download gypsum wallboard HPDs.

FASTENERS — HPD URL: **No HPD available**

CONDITION WHEN RECOMMENDED OR REQUIRED AND/OR OTHER NOTES:
Fasteners for attaching the gypsum wallboard to the studs and tracks. According to IAMPO UES ER-0524: "Screws attaching the gypsum board to the studs in composite wall assemblies shall be No. 6, Type S, fine thread, bugle head drywall screws conforming to ASTM C1002."

The Health Product Declaration (HPD) Open Standard provides for the disclosure of product contents and potential associated human and environmental health hazards. Hazard associations are based on the HPD Priority Hazard Lists, the GreenScreen List Translator™, and when available, full GreenScreen® assessments. The HPD Open Standard v2.1 is not:

- *a method for the assessment of exposure or risk associated with product handling or use,*
- *a method for assessing potential health impacts of: (i) substances used or created during the manufacturing process or (ii) substances created after the product is delivered for end use.*

Information about life cycle, exposure and/or risk assessments performed on the product may be reported by the manufacturer in appropriate Notes sections, and/or, where applicable, in the Certifications section.

The HPD Open Standard was created and is supported by the Health Product Declaration Collaborative (the HPD Collaborative), a customer-led organization composed of stakeholders throughout the building industry that is committed to the continuous improvement of building products through transparency, openness, and innovation throughout the product supply chain.

The product manufacturer and any applicable independent verifier are solely responsible for the accuracy of statements and claims made in this HPD and for compliance with the HPD standard noted.
